1. This very large history (435 pages legal size) is mainly technical in nature. There is a note attached to the front cover which reads "already for technical editing, Walter Elder 15 May 1974." The History Staff does not have any background papers in connection with this writing.

2. The Chapter titles in this history do not reveal as much of the 'true story' as the sub-titles do, therefore, I am attaching a copy of the complete page of Contents.

3. All footnotes are in place, it has been source-referenced; other than the editing, it is almost ready to be published.
